FREE INTRODUCTION COURSES

3D Discovery Day

What exactly is 3D CAD all about? Try these free short presentations designed to introduce you to the world of 3D CAD and show just how easy it is to learn and use and to highlight the numerous benefits of designing in 3D.

This course is suitable for designers, engineers, architects and anyone that needs to create visual representations of new products and concepts.

Hands on Test Drive

During our free hands-on sessions, one of our certified SOLIDWORKS engineers will guide you through the capabilities of the SOLIDWORKS products.

You will experience for yourself the ease-of-use and powerful capabilities that can improve your designs and reduce time-to-market.

This course is suitable for designers, engineers, architects and anyone that needs to know more about SOLIDWORKS and wants hands on experience.

Book today by calling CADspace on 1300 799 223
